* In Europe all electric vehicles are measured against a standardized metric for range. The Worldwide Harmonized Light Vehicle Test Procedure (WLTP) measures the range of a car travelling at an average speed of 30mph in summer temperatures from a 100% to 0% state of charge. The actual range achieved under real conditions varies depending on driving behaviour and other external factors. The certified WLTP range is therefore normally not achievable in real life.

ZEEKR vehicles are equipped with 5G internet connectivity on board. This can be used free of charge by all vehicle passengers for a period of 1 year. While the use of 5G internet connectivity is generally unlimited, ZEEKR expressly reserves the right to temporarily reduce the connection bandwidth (e.g. in case of excessive use exceeding a fair daily usage).

After the 1 year free connectivity period ends, online features, such as video streaming, may remain available through Wi-Fi or mobile hotspots. However, accessing these features through a mobile hotspot may be subject to fees and restrictions imposed by your mobile carrier.

In order to use some streaming services, it is necessary that the user already has a separate account with the respective streaming provider. Streaming providers may vary depending on local availability.

Please note that the information provided here is subject to change.

*A paid subscription to third-party streaming services may be required to access music and media streaming
